PROFILE

Mobile Developer specializing in real-time, map-based, and image-processing applications. Experienced in Kotlin, MVVM, Jetpack Compose, Retrofit, Room, and Firebase, with a proven record of delivering stable, high-performance apps. Passionate about clean architecture, scalability, and great UX.

SKILLS

Languages & Architecture

Kotlin, Java, JavaScript, Clean Architecture (MVVM)

Networking & APIs

Retrofit, REST APIs, Socket.IO, OAuth2/JWT, Firebase (Auth, Firestore, FCM, Crashlytics)

Mobile Development

Android SDK, React Native, Git, CI/CD, Unit Testing, Google Maps API, CameraX, OpenCV, Jetpack Compose, Coroutines, StateFlow, Room, Bluetooth Sockets, Raspberry Pi communication

Payments & Subscriptions

Stripe, Paypal, [Konnnect](#) 🔗

WORK EXPERIENCE

Physiological Signals App, [ITGATE](#)

August 2024 – August 2025 | Sousse, Tunisia

- Built a real-time rPPG mobile app estimating heart rate, SpO₂, and blood pressure from facial video.
- Implemented real-time signal processing (FFT, filtering, interpolation) with CameraX; performed on-device processing and server-side aggregation.
- Built Bluetooth communication with Raspberry Pi devices to join Wi-Fi, deploy app updates, and receive images from onboard cameras.
- **Technologies used** Kotlin, OpenCV, CameraX, Socket.IO, Threads, Bluetooth sockets, Retrofit, Room, Raspberry Pi.

Ecoshare (Available on google play & App store), [ITGATE](#) 🔗

January 2024 – July 2024 | Sousse, Tunisia

- Created a ride-sharing platform for school transport optimization with real-time route tracking (Google Maps), QR validation, and chat features.
- Integrated subscription payments, improving user retention and monetization.
- **Tech Stack:** Kotlin, MVVM, Jetpack Compose, Room, Retrofit, Firebase, [Konnnect](#) 🔗 (payments), Socket.IO

Wegestu (Recruitment App), [ITGATE](#)

July 2023 – December 2023 | Sousse, Tunisia

- Built a LinkedIn-style recruitment platform enabling users to create profiles, search jobs, and connect with employers.
- Implemented real-time chat, job filtering, and push notifications to improve user engagement and retention.
- **Tech Stack:** Kotlin, MVVM, Jetpack Compose, Retrofit, Room, Firebase, Socket.IO

ITCHEK (Available on google play & App store), [ITGATE](#) 🔗

January 2023 – July 2023 | Sousse, Tunisia

- Developed a service marketplace app connecting users with verified professionals across multiple fields.
- Integrated Stripe payments, real-time [Socket.IO](#) 🔗 alerts, and Google Maps location services.
- Delivered a scalable backend communication layer and reduced app crashes by 20% through Firebase monitoring.
- **Tech Stack:** Kotlin, MVVM, Google Maps API, Stripe, Socket.IO, Firebase.

Healthcare App, [ITGATE](#)

April 2022 – December 2022 | Sousse, Tunisia

- Built a patient-clinic platform for browsing services, booking appointments, and managing digital health records.
- Implemented secure report and e-prescription exchange with role-based access and GDPR-compliant data handling.
- Added subscription plans and in-app notifications for patient follow-ups and reminders.
- **Tech Stack:** Kotlin, MVVM, Room, Retrofit, Firebase (Auth, FCM), PDF Viewer, REST APIs, OAuth2/JWT.

EDUCATION

Software Engineer, [EPI - International polytechnic school](#) 🔗

2018 – 2021 | Sousse, Tunisia

Bachelor of computer science, [School of sciences and technology](#) 🔗

2015 – 2018 | Hammam Sousse, Tunisia

LANGUAGES

- English (B2)
- French (fluent)
- German (A2)
- Spanish (basic)

PERSONAL PROJECTS

Careflow

2026

Designed and built a healthcare mobile app featuring full light and dark mode support across a complete clinical workflow: login, dashboard, wards, rooms, beds, patient assignment, transfer, discharge, and cleaning status tracking. Delivered a clean, accessible interface optimized for fast navigation in high-pressure care environments. Focused on clear status visualization and intuitive flows to support nurses and staff in real time.

E-Commerce Web Application

2020

E-commerce platform developed with Angular 8, featuring product browsing, customer reviews, and secure online payments through PayPal integration.

Weather app

2019

Cross-platform weather application built with Ionic, supporting Android, iOS, and Web. Displays current weather conditions and forecasts based on the device's GPS location, with the option to search for weather data in any specific location using a weather API.

Blasa , Ride-Sharing Android App

2018

Bachelor final-year project developed in Java for Android, providing a ride-sharing platform with Firebase Authentication, Firebase Realtime Database, and Google Maps API integration. Implemented user registration/login, location-based functionality, and real-time data synchronization between users.
